

Ditech - Analogue Rack based System

The Ditech range of control modules have been in use both onshore and offshore for protecting plant and personnel for many years. Utilising ultra-reliable solid-state electronics, Ditech is available in a range of input, logic, and output modules which can be engineered into complex systems.

Crowcon offers a design service for new systems and system upgrades, as well as spare modules for supporting installed systems.

Features:

Ultimate Flexibility

- Represents the ultimate in customisation, each system is bespoke
- Solid state system for gas, fire and ESD
- Up to 16 channels per 19" rack
- Executive outputs to control extinguishing systems, dampers and emergency shutdown systems

Robust and Reliable

- Designed to meet the needs of the petrochemical industry
- Trusted by EXXONMobil, BP, Shell, Schlumberger & ONGC, amongst others
- All relays are continuously monitored

Family of Modules for Comprehensive Bespoke Systems

- Twin zone fire modules
- Dedicated gas cards
- Logic cards
- Relay cards
- Monitor cards
- Extinguishant release cards
